

Rules regarding access to resources dedicated to master programmes.

The CCC-UAM offers free of charge computing resources available to students enrolled in official master programmes in the Campus.

Applicants for this service may request a login. They must explicitly detail the need to perform calculations related to the programme's subject. The master coordinator must recognize the enrollment of the applicant in the programme.

The provided login will have access only to the resources dedicated to master programmes.

Under no circumstance the resources dedicated to master programmes will be made available to conventional logins being used in other research projects.

All master accounts will be deleted by the end of the academic year. The application process will need to be repeated in order to get access the next academic year.

The resources dedicated to master programmes may not be used for the realization of an end of bachelor degree thesis, nor to any other project unrelated to official master programmes in the UAM.

Inadequate usage of the resources dedicated to master programmes outside the strictly academic goals will result in the immediate disabling of the login and the billing of resources to the master coordinator.
